NOTES:

1. The quantities shall be supplied in accordance with the latest revision of each item;

2. The supplier shall submit a technical proposal to PETROBRAS. The proposal shall also contain a detailed description of the production process, proving all specifications (API 5L and I-ET-3203.0Y-6521-210-PEI-201) were fulfilled. Templates, typical or general documents are not acceptable. The production process description shall be specific to this scope of supply and shall contain all tests, inspection and acceptance criteria required. The acceptance of the pipe proposal is conditioned to the technical analysis by PETROBRAS.

3. The acceptance of the coating proposal is conditioned to the technical analysis by PETROBRAS. The proposal shall contain the following documents:
   - Certificate approving the Quality Management System of the applier, according to ISO 9001 standard, issued by an accredited entity;
   - Applier’s Coating Application Procedure and the respective combination of materials that compose the coating (indicating the manufacturer and commercial references) to be used.
