It states that after research, the Technical Criterion's processes with a large number of families to be evaluated have a high risk of failure. To optimize the registry evaluation and increase the chances of approval, from July 30th 2018, the Technical Criterion's evaluation processes will change:

- For inclusion of new families, the process will be opened with up to 5 families of goods and/or 5 families of services;
- For re-evaluation of reproved families, the process will be opened with up to 5 families of goods and/or 5 families of services;

Have in mind that, with the Brazilian **Law 13.303/16**:

- Any company that is interested can participate the Public Tenders, even if it does not have the family in its registry;
- Companies that have the families that are used in the tenders will be notified as soon as the opportunity is published and the registry data will be able to be used during the qualification phase of this opportunity.

The announcement concludes with 'Best Regards,' and 'Petrobras Suppliers Registry'.
